

Place your iPhone here

← Try to position as precisely as you can

Front Camera

Instructions:

- Print this PDF with actual size setting.
- Avoid light conditions that make shadows under your finger
- The closer your fingers are to the paper, the steadier you can hold your phone.
- Press the upper part of the black key

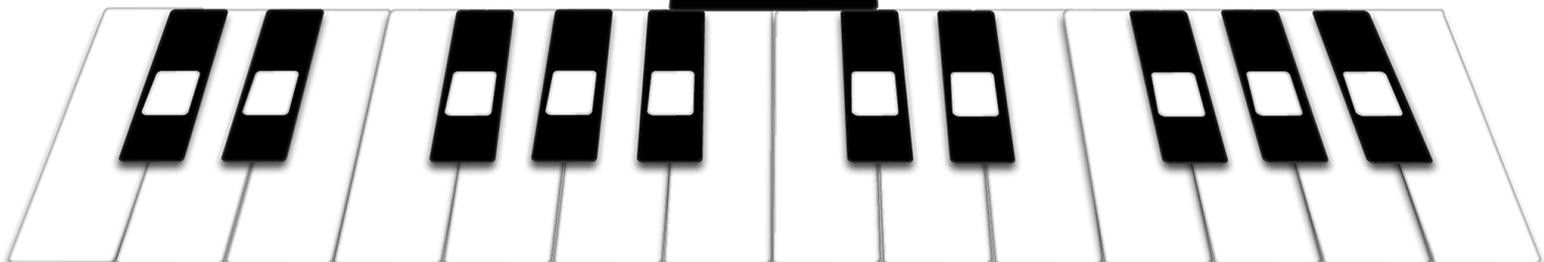

Tips:

- Press the back button if the piano doesn't work well to recalibrate.
- Raise your finger 0.5 inch (1,2 cm) high after pressing a key.
- Fold the paper at the bottom when it gives false sounds.

Octave

↓ Fold the paper here in case of bad light conditions ↓

↑ e.g: strong shadows, low light etc. ↑
